

Şişeniz için kafa bitiş seçimi, seçeceğiniz kapatma türüne bağlı olacaktır. Bununla birlikte, şarap kapaklarının birçok olasılığı vardır (doğal mantarlar, sentetik mantarlar, vidalı kapaklar, Vinolok...) ve bazı önemli teknik parametrelerin dikkate alınması gerekir, örneğin:

- Kullanılan şişe tipi Kapak ve şişe kombinasyonu tarafından oluşturulan genişleme alanı, nakliye ve saklama sırasında bazı sıcaklık değişikliklerine izin verecek kadar yeterli olmalıdır. Bitiş boyutları, kapak / şişe kombinasyonu ile belirlenir. Uzunluğu genellikle 49 veya 45 mm'dir.

- Ürün döngü süresi Şarabın yaşlanma potansiyeline bağlı olarak, şişeleme ile şarabın tüketimi arasındaki zamandır.
